

Growing Patterns

Patterns with three parts

Name: _____

Date: _____

★ I can read a three-part pattern and keep it going.

Some patterns have three parts

This pattern repeats three shapes: triangle, square, circle. Read it out loud to hear how it repeats.

Watch Bit — ▲ ■ ● ▲ ■ ● ...

It goes triangle, square, circle — then starts again. The next one is ▲.

1 Draw what comes next

Read the three-part pattern, then draw the next shape in the dashed box.

2 Draw the next TWO

Keep this pattern going. Draw the next two shapes in the dashed boxes.

3 You try — make your own

Pick two or three shapes (● ▲ ■ ★) and draw your own pattern that repeats.

--	--	--	--	--	--

Big idea

When you know a pattern, you can keep it going as long as you like. Computers use patterns to repeat steps again and again.

Growing Patterns

Quick facilitation notes & answer key

What this worksheet teaches

Children read a three-part repeating pattern, continue it by one and by two shapes, and make their own. Predicting more than one step ahead is a first thinking-skill behind coding. No coding experience needed.

Before you start (no computer needed)

No computer — paper and a pencil or crayon. You read each prompt aloud; the child draws the shapes. Optional: pattern blocks or coloured beads to build patterns by hand first.

How to lead it (about 15 minutes)

1. Show them (you do). Say the three-part pattern aloud — "triangle, square, circle..." The next is a triangle.
2. Do one together. Exercise 1 — circle, square, star, repeating; the next is a circle.
3. Let them try. Children predict the next TWO in Exercise 2, then make their own in Exercise 3.

Answer key (these are the verified correct answers)

Exercise 1 — circle, square, star, circle, square, star → next is a circle.

Exercise 2 — triangle, circle, triangle, circle, triangle → the next two are circle then triangle.

Exercise 3 — any pattern that truly repeats is correct (e.g. star, circle, star, circle...).

If children get stuck — and ways to adjust

Watch for (Ex 2): drawing only one shape. Point to both dashed boxes.

Make it easier: do two-part patterns first, then add the third shape.

Make it harder: ask the child to read their own pattern aloud and continue it two more shapes.

Make it active: stomp-clap-jump, stomp-clap-jump and continue it together.

Ontario Kindergarten link (official wording)

Problem Solving and Innovating — children read, extend, and create repeating patterns.

In plain terms: reading a longer repeating pattern, continuing it, and making one.

No reading is needed from the child — you read each prompt aloud; the child answers by drawing or circling.

You'll know it worked when

The child continues a three-part pattern correctly, draws two correct shapes in Exercise 2, and makes a pattern in Exercise 3 that truly repeats.
