

Build Bit's Stack

Draw the blocks to get Bit to the star

Name: _____

Date: _____

★ I can build a short program to get Bit to the star.

You build it

Now YOU make the program. Draw an arrow in each empty block so Bit reaches the star ★. Use ➡ to go right and ⬅ to go left. Then run your stack from the top to check Bit lands on the star.

Build 1 — Bit on box 1, star on box 4

Your program

Three empty blocks to fill.

1 Get to the star

Draw an arrow in each of the 3 empty blocks so Bit goes from box 1 to the star on box 4. Then run it to check.

Build 2 — Bit on box 4, star on box 2

Your program

The star is to the LEFT this time.

2 Go left to the star

Draw an arrow in each of the 2 empty blocks so Bit goes from box 4 to the star on box 2. Then run it to check.

Build 3 — Bit on box 1, star on box 3

Your program

3 You try — build it yourself

Draw an arrow in each of the 2 empty blocks so Bit goes from box 1 to the star on box 3. Then run it to check.

Big idea

You wrote a program! You picked the blocks and put them in order to make Bit reach the goal. That is what coders do — then they run it to make sure it works.
