

Give Bit the Steps

Write the arrows to reach the star

Name:

Date:

★ I can write the arrow steps that get Bit to the star.

You make the plan

Now YOU give Bit the steps. Look at where Bit is and where the star is. Draw one arrow for each box Bit must move. ➡ goes right, ⬅ goes left.

Watch Bit — box 1 to the star on box 3

Bit must move 2 boxes right. The steps are ➡ ➡.

1 Box 1 to the star on box 4

Bit is on box 1. The star is on box 4. Draw the arrows Bit needs (one per box).

--	--	--

2 Box 2 to the star on box 3

Bit is on box 2. The star is on box 3. Draw the arrows Bit needs.

--	--

3 You try — go left

Bit is on box 4. The star is on box 2. Draw the arrows Bit needs (this time the star is to the left).

--	--

Big idea

When you write the steps that solve a problem, you have made an algorithm. That is exactly what coders do!
