

Same and Different

Matching what is the same

Name:

Date:

★ I can find the card that is the same, and the one that is different.

Bit looks for a match

Bit holds up a card. Help Bit find the card that is the SAME. Cards that look alike are a MATCH.

Watch Bit — Bit's card is •

Bit's card

Which one is the same as •?

no

yes!

no

The circle • is the same as Bit's card. Circle the match.

1 Find the same as ★

Circle the card that is the same as the star. • ★ ▲

2 Find the same as ■

Circle the card that is the same as the square. • ▲ ■

3 You try — which is different?

Three are the same and one is different. Circle the one that is DIFFERENT. • • ▲ •

Big idea

Matching means finding what is the same. Computers match too — like finding the same face in your photos!

Same and Different

Quick facilitation notes & answer key

What this worksheet teaches

Children match a shape to the card that is the SAME, then spot the one that is DIFFERENT. Comparing things as same or different is a first thinking-skill behind coding — it is how computers find and group matching things. No coding experience needed.

Before you start (no computer needed)

No computer — paper and a pencil or crayon. You read each prompt aloud; the child answers by circling. Optional: pairs of matching cards or objects to match by hand first.

How to lead it (about 15 minutes)

1. Show them (you do). Hold up a circle: "find the one that is the same." Point to the matching circle.
2. Do one together. Exercise 1 — the star matches the star.
3. Let them try. Children do Exercise 2, then Exercise 3 (the odd one out) on their own.

Answer key (these are the verified correct answers)

Exercise 1 — circle the star (it matches the star). Exercise 2 — circle the square.

Exercise 3 — circle the triangle; it is different because the other three are all circles.

If children get stuck — and ways to adjust

Watch for: circling more than one. Remind them there is exactly one match.

Make it easier: match real identical objects by hand before using the page.

Make it harder: ask "how is it different?" (shape, corners) to build describing words.

Make it active: hold up a card and have children point to its match around the room.

Ontario Kindergarten link (official wording)

Problem Solving and Innovating — children compare and match objects by attribute as they make sense of their world.

In plain terms: deciding whether two things match or are different — a first comparing skill.

No reading is needed from the child — you read each prompt aloud; the child answers by drawing or circling.

You'll know it worked when

The child circles the one matching card each time, and finds the single different card in Exercise 3.
